6. Key Risks

Specific Risks

(a) Stock Specific Risk

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

(b) Currency Risk

As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

(c) Country Risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of units to fall.

(d) Equity-related Securities Risk

The pricing of the equity-related securities will depend on the price movements of its underlying equities. Any change to the pricing of the underlying equities would either positively or negatively impact the value of the equity-related securities hence impacting the NAV of the Fund.

(e) Credit/Default/Counterparty Risk

This risk refers to the inability of the issuers to fulfil their financial obligations to the Fund in a timely manner. This risk concerns the Fund's investment in equity-related securities, derivatives, structured products and money market instruments. To reduce this risk, the Manager emphasizes on stringent credit selection process in selecting issuers and maintain monitoring mechanism to manage this risk.

(f) Tactical Asset Allocation Fund Risk

This Fund is a tactical asset allocation fund where the strategies employed shifts the asset mix of the Fund between equities and equity-related securities, money market instruments, deposits and collective investment schemes depending on the prevailing market outlook. The Manager's investment decision on the asset allocation may adversely affect the Fund's performance if the assessment concluded by the Manager is not consistent with the market outlook.

(g) Derivatives Risk

The Fund may invest in derivatives for hedging purposes. The NAV of the Fund will be impacted by the valuation of the derivatives. These include, but are not limited to, price movement of the underlying assets, volatility of the underlying assets, interest rate levels and the correlation of the underlying assets. Any change in the aforesaid factors would either positively or negatively impact the valuation of the derivatives hence impacting the NAV of the Fund.

(h) Collective Investment Schemes Risk

Investing in collective investment schemes may be more costly to the Fund than if the Fund had invested in the underlying investments directly as the Fund will indirectly be paying the fees and expenses of the collective investment schemes. The Fund's investments in exchange-traded funds ("ETFs") may subject the Fund to additional risks (such as risks related to the changes in the constituent securities of the index that the ETF is tracking which may result in the rise or fall of the price of the ETF or cessation of the index that the ETF is tracking which may result in the termination of the ETF) than if the Fund would have invested directly in the constituent securities of the index. Any adverse price movements of such ETFs will adversely affect the Fund's NAV.

Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to section 5.1 of the information memorandum for the general risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, we will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.

7. Valuation of Investment

The Fund will be valued **daily** at **11:00 am** on the next business day except during the initial offer period. If the foreign market in which the Fund is invested in is closed for business, the Manager will value the investment based on the latest available price as at the day the particular foreign market was last opened for business.

Unit holders will be able to obtain the price of a unit for a particular business day from **www.fortresscapital.com.my** after **2:00 pm** two (2) business days after the Fund's valuation point. The price of a unit would also be made available upon request by the unit holders.

8. Exiting from Investment

Submission of Redemption Request	The cut-off time for redemption of units shall be at 2:00 pm on a business day.
Payment of Redemption Proceeds	Redemption proceeds will be paid out within ten (10) business days from the day the redemption request is received by the Manager.
Remittance of Redemption Proceeds	The Manager shall remit the redemption proceeds to the unit holder's banking account.
