4. THE FUND

4.1 Investment Objective

The Fund aims to provide medium to long term capital appreciation.

4.2 Investment Strategy

The Fund aims to achieve its objective by adopting a tactical asset allocation strategy where the Fund may invest up to 100% of its NAV primarily in equities, equity-related securities (such as warrants and rights issue) and unlisted securities. The Fund will adopt a value driven approach by selecting securities that appear to be trading or valued below their intrinsic value. The Fund will also hold the flexibility to invest into opportunities in any other markets where the Manager deems attractive. The investment selection for the Fund is unconstrained by any country, sector or market capitalization. However, the Fund will only invest in markets where the regulatory authority is an ordinary or associate members of the International Organization of Securities Commissions.

In addition to equities and equity-related securities, the Fund may invest in other asset classes depending on the prevailing market conditions. These asset classes would range from fixed income securities, money market instruments, deposits and/or collective investments schemes (including but not limited to real estate investment trusts (REITs) and exchange-traded funds (ETFs) (including inverse ETFs)).

The Fund may also invest up to 20% of its NAV in derivatives such as forwards, futures, swaps and/or options, and structured products (including but not limited to equity-linked instruments, asset backed securities, currency-linked instruments).

Equities and equity-related securities are selected through our rigorous investment process. Selection criteria include growth profile, earnings quality, business model, competitive advantage, management quality and capability, corporate governance, balance sheet strength, cash flow strength, industry dynamics, and relative valuation.

The Fund adopts a tactical asset allocation, for example, when economic conditions are expected to be favourable, the Fund will have higher equity exposure; when economic conditions are expected to become less attractive, the Fund will preserve its capital with higher cash levels by investing in fixed income securities, money market instruments, deposits or collective investment schemes (such as inverse ETFs).

Temporary Defensive Position

In times of extreme market volatility, we hold the option to take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation.

4.3 Asset Allocation

- 0% - 100% of the NAV of the Fund will be invested in equities, equity-related securities and unlisted securities;
- 0% - 100% of the NAV of the Fund will be invested in fixed income securities, money market instruments and/or deposits;
- 0% - 100% of the NAV of the Fund will be invested in collective investment schemes (such as REITs and ETFs); and
- 0% - 20% of the NAV of the Fund will be invested in derivatives and structured products.

4.4. Permitted Investments

Unless otherwise prohibited by the relevant authorities or any relevant laws and provided always that there is no inconsistency with the investment objective of the Fund, the Fund will invest in the following permitted investments:

- (1) equities and equity-related securities;

- (2) fixed income securities;
- (3) money market instruments;
- (4) deposits;
- (5) collective investment schemes (including REITs and ETFs);
- (6) structured products;
- (7) unlisted securities;
- (8) derivatives; and
- (9) any other investments which are in line with the Fund's objective.

4.5. Investment Restrictions and Limits

The Fund is not subject to any investment restrictions and limits.

5. GENERAL RISKS AND SPECIFIC RISKS OF THE FUND

5.1 General Risks of Investing in the Fund

(a) Market Risk

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.

(b) Liquidity Risk

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.

(c) Inflation Risk

This is the risk that investors' investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce the investors' purchasing power even though the value of the investment in monetary terms has increased.

(d) Manager's Risk

This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the Fund.

(e) Loan Financing Risk

This refers to the risk of Unit Holders investing in the Fund with borrowed money and is not able to service the loan repayments. In the event Units are used as collateral, Unit Holders may be required to top-up existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.

(f) Risk of Non-compliance

This refers to the risk where the Manager does not comply with the applicable rules, laws, regulations or the Deed. Although not every non-compliance will necessarily result in some losses to the Fund, there is always a risk that losses may be suffered by the Fund. For example, if the Manager is forced to dispose off any investments of the Fund at loss to resolve the non-compliance. Notwithstanding that, the Manager has imposed stringent internal compliance controls to mitigate this risk.

(g) Operational Risk

This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to Unit Holders. The Manager will regularly review its internal policies and system capability to mitigate this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.

5.2 Specific Risks of the Fund

(a) Stock Specific Risk

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

(b) Currency Risk

As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

(c) Country Risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.

(d) Equity-related Securities Risk

The pricing of the equity-related securities will depend on the price movements of its underlying equities. Any change to the pricing of the underlying equities

would either positively or negatively impact the value of the equity-related securities hence impacting the NAV of the Fund.

(e) Credit/Default/Counterparty Risk

This risk refers to the inability of the issuers to fulfil their financial obligations to the Fund in a timely manner. This risk concerns the Fund's investment in equity-related securities, fixed income securities, derivatives, structured products and money market instruments. To reduce this risk, the Manager emphasizes on stringent credit selection process in selecting issuers and maintain monitoring mechanism to manage this risk.

(f) Tactical Asset Allocation Fund Risk

This Fund is a tactical asset allocation fund where the strategies employed shifts the asset mix of the Fund between equities and equity-related securities, fixed income securities, money market instruments, deposits and collective investment schemes depending on the prevailing market outlook. The Manager's investment decision on the asset allocation may adversely affect the Fund's performance if the assessment concluded by the Manager is not consistent with the market outlook.

(g) Derivative Risk

The Fund may invest in derivatives relating to, for example, currencies, securities, indices and interest rates. The performance and valuation of the derivatives depend on factors which include but are not limited to the price movement of the underlying assets, volatility of the underlying assets, interest rate levels and correlation of the underlying assets. Any change in the aforesaid factors would either positively or negatively impact the performance and valuation of the derivatives hence impacting the NAV of the Fund. Investment in derivatives involve costs, may be volatile, and may involve investment risks that may not be proportionate to the investment amount in the derivatives (leverage effect).

(h) Collective Investment Schemes Risk

Investing in collective investment schemes may be more costly to the Fund than if the Fund had invested in the underlying investments directly as the Fund will indirectly be paying the fees and expenses of the collective investment schemes. Additionally, the Fund's investments in real estate investment trusts ("REITs") will involve many of the same risks associated with direct ownership of real estate, including but not limited to possible declines in real estate's value, increase in interest rates and real estate borrowing costs, changes in property taxes, higher operating expenses, damages from natural or man-made disasters, and fall in market rental rates. The Fund's investments in exchange-traded funds ("ETFs") may subject the Fund to additional risks (such as risks related to the changes in the constituent securities of the index that the ETF is tracking which may result in the rise or fall of the price of the ETF or cessation of the index that the ETF is tracking which may result in the termination of the ETF) than if the Fund would have invested directly in the constituent securities of the index. Any adverse price movements of such REITs and ETFs will adversely affect the Fund's NAV.

5.3 Risk Management Strategy and Technique

The Manager seeks to mitigate the identified risks associated with the Fund by imposing stringent internal controls, compliance monitoring, and by virtue of its experience, skills, governance and diligence.

Investors are advised to read the Info Memo and obtain professional advice before subscribing to the Fund.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not always possible to protect your investment against all risks.

The investments of the Fund carry risks and we recommend that you read the whole Info Memo to assess the risks of the Fund.

6. PRICING POLICY AND FEES

6.1 Pricing Policy

NAV and NAV per Unit

The NAV of the Fund is determined by deducting the value of all the Fund's liabilities from the value of all the Fund's assets, as at the valuation point.

The NAV per Unit is the NAV of the Fund divided by the number of Units in circulation, at the same valuation point.

Selling Price

The selling price shall be equivalent to the NAV per Unit. Any applicable sales charge shall be payable separately from the selling price. During the IOP, the selling price is equivalent to the Initial Offer Price. After the IOP, forward pricing will be used to determine the selling price of the Fund, which is the NAV per Unit as at the next valuation point after the purchase request is received by the Manager.

Illustration – Calculation of selling price

Units will be sold at the Initial Offer Price during IOP and thereafter, the NAV per Unit. Any sales charge payable by the Unit Holder would be calculated as a percentage of the Initial Offer Price during IOP and thereafter, of the NAV per Unit.

For illustration purposes, we would assume the following during the IOP:

Amount invested:	SGD100,000.00
Sales charge:	5.00% of the Initial Offer Price
Initial Offer Price:	SGD1.00 (selling price)

The investment amount, number of Units purchased and sales charge payable by the Unit Holder are as follows:

Items	Calculation	Amount
Amount invested	-	SGD100,000.00

Number of Units purchased	Amount invested divided by the Initial Offer Price = SGD100,000.00 ÷ SGD1.00	100,000 Units
Sales charge of 5.00% on the Initial Offer Price	Sales Charge x Initial Offer Price x No. of Units = 5.00% x SGD1.00 x 100,000 Units	SGD5,000.00

Total amount invested = SGD 100,000.00

Add Sales Charge paid @ 5.00% of the Initial Offer Price = SGD 5,000.00

Total amount paid by Unit Holder =SGD 105,000.00

The same calculation shall be applicable after the IOP except that the selling price shall be the NAV per Unit.

Redemption Price

The redemption price shall be equivalent to the NAV per Unit. Any applicable penalty charge shall be payable separately from the redemption price. During the IOP, the redemption price is equivalent to the Initial Offer Price. After the IOP, forward pricing will be used to determine the redemption price of the Fund, which is the NAV per Unit as at the next valuation point after the redemption request is received by the Manager.

Illustration – Calculation of redemption price

The redemption price shall be the Initial Offer Price during the IOP and thereafter, the NAV per Unit. Any penalty charge payable by the Unit Holder would be calculated as a percentage of the Initial Offer Price during the IOP and thereafter, of the NAV per Unit.

For illustration purposes, we would assume the following after the IOP:

Total of Units to be redeemed: 100,000 Units
 Penalty charge: Nil
 NAV per Unit: SGD1.00 (redemption price)

The redemption proceeds payable to the Unit Holders are as follows:

Items	Calculation	Amount
Number of Units redeemed	-	100,000 Units
Amount redeemed	Total Units redeemed x NAV per Unit = 100,000 Units x SGD1.00	SGD100,000.00
Penalty charge is 0% of the NAV per Unit	Penalty charge x amount redeemed = 0% x SGD100,000.00	SGD 0.00

Total amount redeemed	= SGD100,000.00
<u>Less penalty charge of 0% of NAV per Unit</u>	<u>= SGD.00</u>
Total amount paid to Unit Holder	= SGD100,000.00

6.2 Fees Charged to the Fund

Annual Management Fee

The annual management fee is 1.25% per annum of the NAV of the Fund.

Please note that the example below is for illustration only:

Assuming that the NAV of the Fund is SGD100 million for the day, the daily accrued management fee would be:

$$\frac{\text{SGD100 million} \times 1.25\%}{365 \text{ days}} = \text{SGD3,424.66. per day}$$

The management fee is accrued daily and payable monthly to the Manager.

Annual Trustee Fee

The Trustee will be entitled to an annual trustee fee of up to 0.04% per annum of the NAV of the Fund (excluding foreign custodian fees and charges), subject to a minimum fee of RM18,000.00 per annum.

Please note that the example below is for illustration only:

Assuming that the NAV of the Fund is SGD100 million for the day, the daily accrued trustee fee would be:

$$\frac{\text{SGD100 million} \times 0.04\%}{365 \text{ days}} = \text{SGD109.59 per day}$$

The trustee fee is accrued daily and payable monthly to the Trustee.

Other Expenses

Only fees and expenses that are directly related and necessary to the operation and administration of the Fund may be charged to the Fund, which include but are not limited to the following:

- commissions or fees paid to brokers or dealers in effecting dealings in the investments of the Fund;
- taxes and other duties charged on the Fund by the government and/or other authorities;
- costs, fees and expenses properly incurred by the auditor of the Fund;
- costs, fees and expenses incurred for any modification of the Deed save where such modification is for the benefit of the Manager and/or the Trustee;
- costs, fees and expenses incurred for any meeting of the Unit Holders save where such meeting is convened for the benefit of the Manager and/or the Trustee;
- charges and fees paid to sub-custodians taking into custody any foreign assets of the Fund;
- expenses and charges incurred in connection with the printing and postage for the annual or quarterly report, tax certificates and other services associated with the administration of the Fund;
- costs, fees and expenses incurred by the registrar and transfer agency in relation to the Fund;

- costs, fees and expenses incurred for the fund valuation and accounting of the Fund; and
- any other fees and expenses permitted by the Deed.

7. VALUATION POINT AND VALUATION OF ASSETS OF THE FUND

7.1 Valuation Point

The Fund will be valued **daily** at **11:00 am** on the next Business Day except during the IOP. If the foreign market in which the Fund is invested in is closed for business, we will value the investment based on the latest available price as at the day the particular foreign market was last opened for business.

The Manager shall ensure that the assets of the Fund are valued fairly and appropriately.

For currency translation of foreign investments to the Fund's base currency (SGD), the valuation shall be based on the bid exchange rate quoted by Bloomberg or Reuters at United Kingdom time 4:00 pm which is equivalent to 11:00 pm or 12:00 midnight (Malaysian time) on the same day, or such other time as may be prescribed from time to time by the Federation of Investment Managers Malaysia or any relevant laws.

The Manager shall convert all expenses and income of the Fund denominated in currencies other than SGD into the Fund's base currency, SGD.

7.2 Valuation of Assets of the Fund

Listed equities, listed equity-related securities and listed collective investment schemes ("listed securities") will be valued daily based on the last done market price.

However, if:-

- a valuation based on the market price does not represent the fair value of the listed securities, for example during abnormal market conditions; or
- no market price is available, including in the event of a suspension in the quotation of listed securities for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee,

then the listed securities would be valued at fair value, as determined in good faith by the Manager based on the methods or bases approved by the Trustee after appropriate technical consultation.

Fixed income securities will be valued daily based on the last price quoted and derived from Bloomberg Generic Price.

Deposits placed with financial institution(s) will be valued daily by reference to the principal value of such deposits and the interests/profits accrued thereon for the relevant period.

Money market instruments will be valued daily based on the last price quoted and derived from Bloomberg Generic Price ("BGN"). If the price of the money market instruments are not available on the BGN, the money market instruments will be valued daily at cost, adjusted for amortisation of premium or accretion of discount over their par value at the time of acquisition, less provision for any diminution in value.

Derivatives and structured products are valued daily based on marked-to-market price.

Unlisted collective investment schemes are valued daily based on the last published repurchase price.

Unlisted securities are valued daily based on the cost price at the point of purchase.

Any other investment will be valued at fair value as determined in good faith by us, on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

8. COMPUTATION OF NAV AND NAV PER UNIT

Illustration on computation of NAV and NAV per Unit for a particular valuation day:-

Assets of the Fund	50,000,000.00
Add: Income	10,000,000.00
Gross asset value/ GAV	60,000,000.00
Less: Fund expenses	(350,000.00)
NAV of the Fund (before deduction of management fee and trustee fee)	59,650,000.00
Less:	
Management fee for the day (1.25% of the NAV)	(2,042.81)
Trustee fee for the day (0.04% of the NAV)	(65.37)
Total of Units in circulation for that day	50,000,000
NAV of the Fund (after deduction of management fee and trustee fee)	59,647,891.82
NAV per Unit (in SGD)	SGD 1.1930

Note: *The Manager's rounding policy is four (4) decimal points for the purposes of publication of the NAV per Unit. However, the rounding policy will not apply when calculating the sales charge and penalty charge payable by investors.*
